

Hillsborough Township Fire District

Incident Response Temporary New Guidelines

The Corona Virus has impacted every aspect of our daily lives. While you as residents have also been forced to make dramatic changes, so have your first responders including Police, Fire, EMS, and all other public employees.

Our primary concern is always safety, not only for you the public but that of our first responders as well. These are the steps being taken by the Hillsborough Township Fire District.

Responses to investigations or activated alarms within the interior of a structure and to automobile accidents with patient contact the first responders will be dressed in full personal protective equipment along with masks (which may include self-contained breathing apparatus) and medical gloves. A crew of two will enter the interior of the structure while other members will be positioned outside or will remain inside the apparatus unless needed.

If you witness this type of response procedure there is no need for alarm or panic, these are just the additional safety measures being taken during this worldwide health emergency to keep everyone as safe as possible.
